

FortiNDR™ Cloud

Highlights

- 365-day historical deep network traffic visibility and analytics
- Curated threat intelligence, powered by FortiGuard Labs, for reduced false positives
- Fortinet Security Fabric and third-party integrations
- Leverage AI, expert analysis, and cloud compute for threat detection
- Coverage for over 90% of MITRE ATT&CK techniques

Network Detection and Response

Fortinet's SaaS-based FortiNDR Cloud leverages artificial intelligence (AI) and machine learning (ML), behavioral, and human analysis to inspect network traffic to detect malicious behavior early while reducing false positives. FortiNDR Cloud provides unified network traffic visibility across multi-cloud and hybrid environments as well as distributed workforces and constrained, mission-critical environments.

FortiNDR Cloud automatically identifies anomalous and malicious behavior, provides risk scores, and shares relevant threat intelligence to assist security teams in prioritizing response efforts.

As the world's only Guided-SaaS NDR, FortiNDR Cloud provides dedicated Technical Success Manager (TSM) support. TSMs act as trusted advisors who share findings, tune configurations, and help organizations optimize NDR deployments.

Highlights

Key Features

- Guided SaaS with trusted advisors
- 365-day data retention for retrospective analysis and threat hunting
- Hunt adversaries with Guided Queries
- Automatic and manual response for quarantine and control
- Orchestrated response with integrations with Fortinet and third party tools including CrowdStrike, FortiEDR, Splunk, Cortex, FortiSIEM, FortiSOAR, and Microsoft Sentinel
- Global crowdsourced threat intelligence from numerous third-party feeds and proprietary sensors

Basic Competencies

Improved Visibility of Threats

Real-time, automated investigation of network security incidents and extended historical network visibility enable a faster, more comprehensive response to threats. Because the impact of an intrusion increases over time, real-time response is the best way to minimize damage.

Get Expertise on Demand

FortiNDR Cloud helps security teams overcome the skills gap challenge by providing Technical Success Manager (TSM) support. TSMs act as trusted advisors who share findings, tune configurations, and help organizations optimize NDR deployments.

Fewer Distractions from False Positives and Detection Tuning

With threat analysis and detection tuning provided in real-time, organizations are less vulnerable while awaiting a vendor's application patch or anti-malware signature.

365-day Data Retention for Retrospective Analysis and Threat Hunting

FortiNDR Cloud retains rich network metadata for 365 days, enabling a comprehensive investigation. This data ensures newly discovered tools, tactics, and procedures can be retroactively investigated to discover if and when threats may have infiltrated the customer's network.

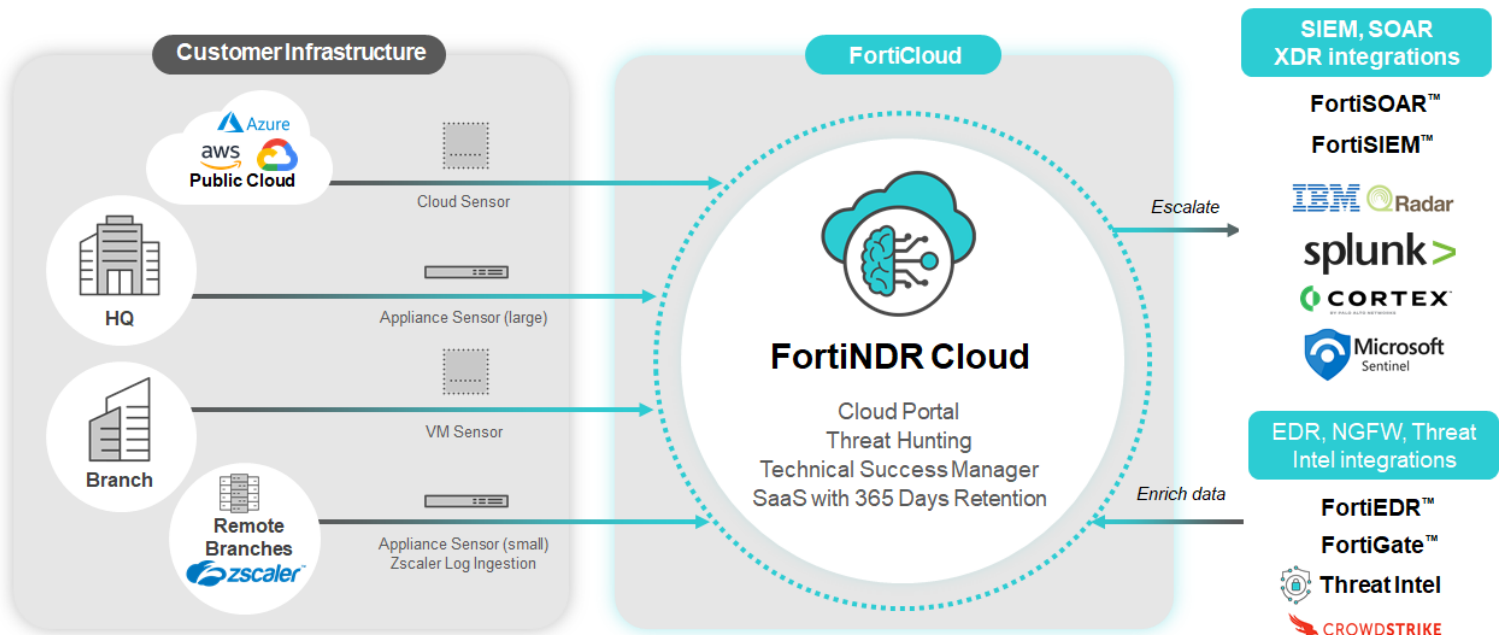

Reconnaissance	Resource Development	Initial Access	Execution	Persistence	Privilege Escalation	Defense Evasion	Credential Access	Discovery	Lateral Movement	Collection	Command and Control	Exfiltration	Impact
Active Scanning	Compromise Accounts	Drive-by Compromise	Command and Scripting Interpreter	BITS Jobs	Boot or Logon Assistant Execution	BITS Jobs	Adversary in-the-Middle	Account Discovery	Exploitation of Remote Services	Adversary in-the-Middle	Application Layer Protocol	Automated Exfiltration	Data Encrypted for Impact
Gather Victim Identity Information	Establish Accounts	Explicit Public-Facing Application	Command and Scripting Interpreter	Boot or Logon Assistant Execution	Create or Modify System Processes	Build Image on Host	Brute Force	Domain Trust Discovery	Internal Spearphishing	Data from Configuration Repository	Data Encoding	Data Transfer Size Limits	Data Manipulation
Phishing for Information		External Remote Services	Scheduled Task/Job	Browser Extensions	Event Triggered Execution	Desktop/Local Device Files or Information	Credentials from Processed Source	File and Directory Discovery	Lateral Tool Transfer	Data from Local System	Data Obfuscation	Exfiltration Over Alternative Protocol	Defacement
		Hardware Additions	Scripting	Create or Modify System Processes	Process Injection	Executable GUIDs	Formal Authentication	Group Policy Discovery	Remote Service Session Hijacking	Data from Network Shared Drive	Dynamic Resolution	Exfiltration Over C2 Channel	Endpoint Denial of Service
		Phishing	System Services	Event Triggered Execution	Scheduled Task/Job	Indicator Removal	OS Credential Dumping	Network Service Discovery	Remote Services	Email Collection	Encrypted Channel	Exfiltration Over Other Network Medium	Network Denial of Service
		Trusted Relationship	User Execution	External Remote Services	Valid Accounts	Manipulating	Steal or Forge Kerberos Tickets	Network Share Discovery	Use Alternate Authentication Material		Fallback Channels	Exfiltration Over Web Service	Resource Hijacking
		Valid Accounts	Windows Management Instrumentation	Pre-OS Boot		Network Boundary Bridging		Permission Groups Discovery			Ingress Tool Transfer	Scheduled Transfer	
				Scheduled Task/Job		Obfuscation of Files or Information		Remote System Discovery			Multi-Stage Channels	Transfer Data to Cloud Account	
				Server Software Component		Pre-OS Boot		System Information Discovery			Non-Application Layer Protocol		
				Traffic Signaling		Process Injection		System Network Configuration Discovery			Non-Standard Port		
				Valid Accounts		Register Domain Controller		System Network Connections Discovery			Protocol Tunneling		
						Rootkit		System Owner/User Discovery			Proxy		
						Scripting					Remote Access Software

						System Binary Proxy Execution					Web Service		
						Templating Injection							
						Traffic Signaling							
						Use Alternate Authentication Material							
						Valid Accounts							

Over 90% MITRE ATT&CK Coverage

- Coverage - Behavioral detection on primary or secondary ATT&CK ID
- Coverage - Non-behavioral detection on primary or secondary ATT&CK ID
- No Coverage

FortiNDR™ Cloud Deployment

Features	FortiNDR Cloud
Deployment	SaaS
Security Analyst	Guided-SaaS with TSM (Technical Success Manager)
Data Storage Location	Cloud-based (US or EU)
Data Retention	365 Days
Investigation / Threat Hunting	Guided Queries and Parallel Hunting
Malware Identification	FortiGuard Malware feed; VirusTotal lookup
MITRE ATT&CK Framework Mapping	Detections and Playbooks mapped to MITRE ATT&CK Framework
Response Integration	Fortinet Security Fabric Third-party API (Rest) MetaStream (AWS S3) Integrations with CrowdStrike, FortiEDR, FortiSIEM, FortiSOAR, Cortex, Splunk, QRadar, and Microsoft Sentinel
Sensors	Hardware: FortiNDR Cloud-2540G (Extra Large sensor) Hardware: FortiNDR Cloud-900F (Large sensor) Hardware: FortiNDR Cloud-500F (Small sensor) Virtual Sensors (AWS / Azure / ESXi / HyperV / GCP / KVM)

Ordering Information

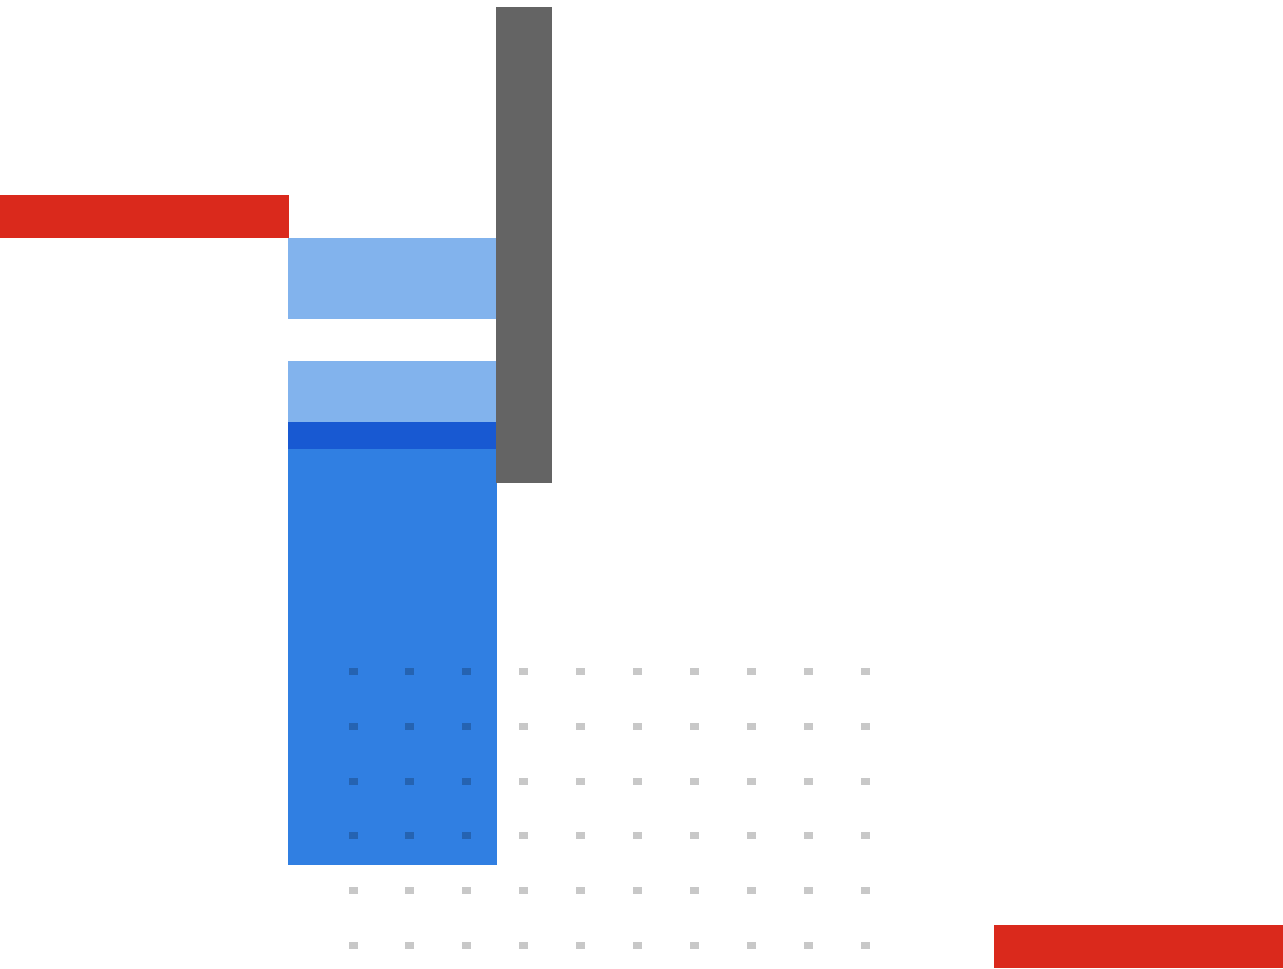

FORTINDR CLOUD		
Product	SKU	Description
FortiNDRCloud-SAAS Services	FC1-10-NDRCL-667-02-12	Annual Subscription license for FortiNDR Cloud Guided-SaaS Platform with Detections, Investigations, Playbooks, and Reports at 1 Gbps of metered usage. Includes FortiCare premium. Does not include physical sensors.
True Up Usage	NDRC-TRUEUP-1MTH	Throughput True-up SKU for traffic overages in FortiNDR Cloud for 1 Gbps of metered usage.
FortiNDRCloud-500F	FNRC-500F	FortiNDRCloud 500F (small) physical sensor to deliver data to FortiNDR Cloud SaaS Platform. Hardware only. 1U with 2x Copper / 2x Fiber SFP+. Must purchase support. Ship with 2x 10G multimode transceivers.
Small Sensor (500F) Licence and Support	FC-10-NDR5F-247-02-DD	Annual license for support for FNRC-500F (small) sensor and forwarding traffic to the FortiNDR Cloud SaaS Platform, includes FortiCare premium.
FortiNDRCloud-900F	FNRC-900F	FortiNDRCloud 900F (large) physical sensor to deliver data to FortiNDR Cloud SaaS Platform. Hardware only. 1U with 2x Copper / 2x Fiber SFP+. Must purchase support. Ship with 4x 10G multimode transceivers.
Large Sensor (900F) Licence and Support	FC-10-NDR9F-247-02-DD	Annual license for support for FNRC-900F (large) sensor and forwarding traffic to the FortiNDR Cloud SaaS Platform, includes FortiCare premium.
FortiNDR Cloud-2540G	FNRC-2540G	FortiNDR Cloud 2540G (extra large) physical sensor to deliver data to FortiNDR Cloud SaaS Platform. Hardware Only. 2U with 1x GbE copper, 2x 10GbE SFP+, 2x 25GbE SFP28. Must purchase support. Transceivers *not* included.
Extra Large Sensor (2540G) Licence and Support	FC-10-ND25G-247-02-DD	FortiNDRCloud-2540G Annual license for support for FNRC-2540G (extra-large) sensor and forwarding traffic to the FortiNDR Cloud SaaS Platform, includes FortiCare premium.
FortiNDR Cloud log Ingestion	FC1-10-NDRCL-1009-02-DD	Annual Subscription license for FortiNDR Cloud to consume third party logs for detections (for example, Zscaler). SKU is based on 1000 EPS (events per second). Must purchase FortiNDR Cloud Guide SaaS with this subscription.
