# VARONIS

Varonis Data Security Platform

Automated data security for SaaS, IaaS, databases, and datacenters

Varonis delivers effortless data security and compliance outcomes powered by automation. Even when you're not logged in, Varonis continuously classifies your data, remediates exposure, and stops cyberattacks.

**Varonis is a Leader in the Forrester Wave for Data Security Platforms.**

Available on the Azure and AWS marketplaces.

Free Data Risk Assessment

Join 7,000+ organizations that traded data darkness for automated protection. Get started in minutes.
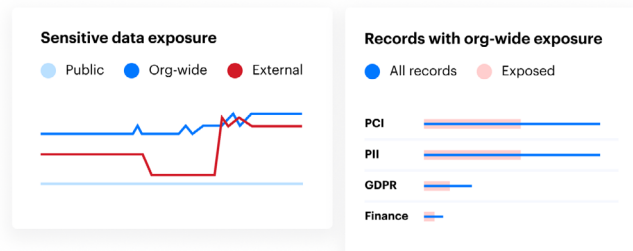

Know where your sensitive data lives.

Automatically discover, classify, and label sensitive and regulated data with extreme accuracy.

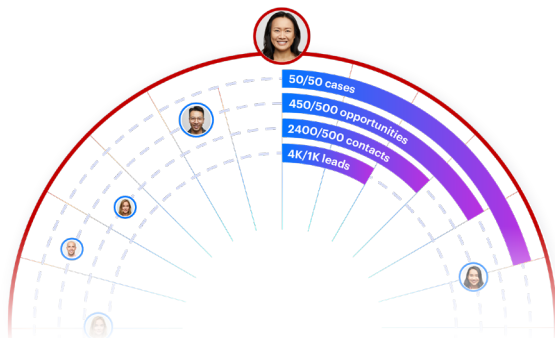

Quantify your data exposure.

Get a real-time, prioritized view of your data security and compliance posture.

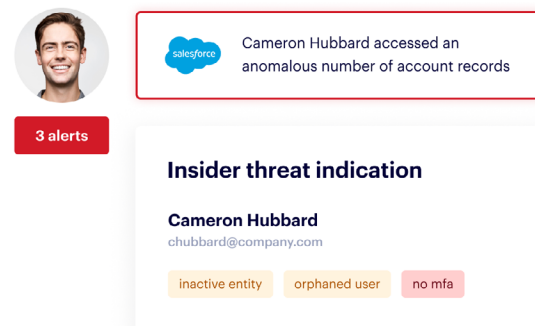

Reduce your blast radius.

Continually remediate data exposure and misconfigurations with intelligent automation.

Detect and stop cyberattacks.

Get industry-leading UEBA and a team of analysts that will investigate and respond to alerts for you.

"Don't just think of Varonis as time-saving; think of it as risk-reducing. It finds problems you otherwise wouldn't even know existed."

Matthew Mudry

VP and Global Head of Cybersecurity, HomeServe
